DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Inoue et al. (US006295503B1).

Per claim 1, Inoue teaches a route searching apparatus including a map data acquiring unit (24, figure 1), a route searching unit for searching for a route to a destination in consideration of road links corresponding to specific roads, on which determination of whether or not a vehicle is allowed to travel can be performed according to a condition of the vehicle (column 2, lines 38-42), before the condition of the vehicle is set (see figure 3; route calculation with "not-decided" nodes), and an output unit for outputting the route (28, figure 1).

Per claim 2, Inoue teaches counting road links corresponding to specific roads as targets to be searched (column 8, lines 24-38).

Per claim 3, Inoue teaches urging setting of the condition (column 10, lines 54-57).

Per claim 4, Inoue teaches that if the condition meets the requirements for permission to drive on the specific road, the route is sent to the display and if it does not, the route is calculated excluding those roads (column 9, lines 51-67).

Application/Control Number: 10/773,181

Art Unit: 3661

Per claim 5, Inoue teaches urging setting of the condition based on the position (column 10, lines 58-65).

Per claim 6, Inoue teaches calculating the route excluding the specific roads (column 9, lines 51-67).

Per claim 7, Inoue teaches urging setting of the condition (column 10, lines 54-57).

Per claim 8, Inoue teaches that if the condition meets the requirements for permission to drive on the specific road, the route is sent to the display and if it does not, the route is calculated excluding those roads (column 9, lines 51-67).

Per claim 9, Inoue teaches urging setting of the condition based on the position (column 10, lines 58-65).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamazaki (US20010021895A1) teaches a navigation system with restricted lane availability consideration. Peterson (US00RE38724E) teaches a method and apparatus for providing a shortest elapsed time route and tracking information to users. Khavakh et al. (US006192314B1) teaches a method and system for route calculation in a navigation application.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric M. Gibson whose telephone number is (571) 272-6960. The examiner can normally be reached on M-F.

Art Unit: 3661

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Black can be reached on (571) 272-6956. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
